

# Pay@Table

## Pay@Table saves time for staff and customers and helps you avoid double-keying errors.

Clear tables and keep your customers coming back. Integrate game-changing card payment processing capability with your ePOS to save time, reduce errors and ensure you give your customers the best experience possible.

**Pay@Table** allows you to input a table or cheque number directly into the terminal and retrieve a bill in seconds, meaning that you can provide quick, efficient service to your customers. What's more you can make it easy for customers to split their bill, pay in their own currency and include gratuity.

### Bring the till to the table:

- Make it easy for customers to split the bill.
- Allow international customers to pay in their home currency.
- Give customers the option to include gratuity.
- Avoid double-keying errors.
- Save staff from running between till and table.
- Work with any ePOS solution, including Oracle.
